

Smart rental solution

TEMPORARY FABRIC BUILDINGS TO PROTECT STORAGE FROM THE ELEMENTS

WHY THE EZKIT™ IS PERFECT FOR YOUR CUSTOMERS

Modular design

You can purchase the structures and options separately, mixing and matching them to rent customized products to your customers

Adapted to multiple sectors

EzKit™ meets the various needs of the construction, industrial, and agricultural sectors

Easy to rent

Designed to solve the challenges faced by equipment rental centers and to meet the needs of their customers

Expert Support

Our experts are there to provide guidance and assistance every step of the way

EASY TO RENT

EzKit™ is a temporary building designed to solve the challenges faced by equipment rental centers and to meet their clients' needs

Quick and easy to install and dismantle, requiring minimal equipment and labour

Comes in a kit to help with handling and inventory management

Durable enough to rent out many times without damage

Order and receive replacement parts quickly

MODULAR DESIGN

Rent the perfect customized building to your customers

Step 1 : Choose the structure

The standard model comes with two open ends and is covered by a membrane to let natural light in, providing a bright space for your clients.

Step 2 : Add options

Choose from different options to create the right temporary structure.
Each option is sold separately and can be added to any structure.

BRANDED

Personalize your temporary building by adding your company logo on the fabric

TWO CLOSED ENDS WITH A DOOR

Maximum protection against the weather with a quick and easy access

ONE CLOSED END

Provides additional weather protection without completely closing the ends

NATURAL VENTILATION

The ventilation system offers optimal air circulation inside the building

PRODUCT SPECIFICATIONS

- ✓ Can be built on most sites or surfaces
